

[Click here](#)

All the monkeys have the same body and lower legs. Slight differences are made to the arms and heads. Each monkey measures 3 ¼" wide by 2 ½" high when worked in no. 20 thread.

Abbreviations

| | | | |
|------|---------------------|-----|----------------------------|
| R | ring | Ch | chain |
| SR | split ring | SLT | shoe lace trick (tie knot) |
| vsp | very small picot | SS | switch shuttles |
| Cl | close | RW | reverse work |
| DNRW | do not reverse work | + | join |
| Lj | lock join | | |

Note all joins are made with the thread closest to the picot which is being joined to. I've used [this method of block tatting](#). This page shows how to [add the eye beads](#).

Throughout this pattern italics and red text show indicate back side tatting. On the diagrams the red numbers refer to the number of the chain numbers in the text.

CTJ: This is made by holding the shuttle with thread closest to last SR in the left hand and pulling it up or down (as stated in pattern) through the VSP and taking the other shuttle thread through the loop formed. Continue through each successive VSP. [See this page for further help.](#)

Materials required for each monkey. 2 shuttles, thread and 2 beads for eyes.

Body for All Monkeys
