

[Click here](#)

Materials required – size 20 thread, seed beads, 6 four hole buttons (size $\frac{3}{8}$ ") and a clasp which can be an adjustable one. The basic instructions are for a bracelet that will fit a wrist measuring 6 $\frac{1}{2}$ " if using a regular finding. The length can also be adjusted by adding a ring or a self closing mock ring on the chain at each end before joining to the clasp.

Abbreviations

R	ring	Ch	chain
Cl	close	RW	Reverse work
B or B B B	1 bead (or 3) moved into place	MB	Move bead along core thread
bttn	button	SR	Split ring
+	join	+ B	Add bead to picot before joining

This link will show you how to [add beads to the top of the button](#).

Note: for those who prefer front side/back side tatting the text in italics and red indicates where the worker needs to use the second half of the ds first.

Place 130 beads on shuttle 1, 108 on shuttle 2. Further beads are required to add to the picots over the button and to picots between the rings.
