### Abbreviations

SSSR	Single shuttle split ring	Cl	close
SS	Switch shuttles	Lj	Lock join
AJ	Alligator join	Ch	Chain
vsp	Very small picot	SLT	Shoe lace trick

All SSSR's are made carrying the second shuttle thread through the first side – [see this link](#).  
The lock chain in this pattern is one half ds as usual and the second half not 'flipped'.

Start with first colour (in this case the purple used on the diagrams).

R: 4 + (finding) 4 Cl SLT SS – leave a small space before starting the SSSR

SSSR: 3 vsp 3 / 3 vsp 3 Cl

LCh: vsp (make one ordinary ds followed by second half unflipped) 5 Lj (vsp last SSSR) 6 AJ (over space between R1 & start of SSSR2) 6 Lj (vsp last SSSR) 6 Lj (vsp on at start of LCh)

LCh: leave small space 4 continue with

Ch: vsp 10 AJ (over space at start of last LCh) 10 Lj (vsp at start of Ch) SLT SS

Repeat from start of SSSR leaving a small space as before.

When you have worked the length required finish off with a ring like the first one joining this to the other end of the finding.
