This is one of a set of three patterns showing cats in three positions. The cat below was worked in no. 20 thread and measures $4 \frac{1}{4 \prime \prime} \times 2 \frac{1}{2} 2^{\prime \prime}$.

## Abbreviations

| SR | split ring | Lj | lock join using shuttle | RoSR | ring formed on second part of |
| :--- | :--- | :--- | :--- | :--- | :--- |
| th | long picot | Wsh1 | working shuttle 1 | Wsh2 | SR |
| working shuttle 2 |  |  |  |  |  |
| vlp | very long | vsp | very small picot | p or - | picot |
| btwn | between | $+B$ | add beads to picot | Cl | close |

The instructions given are for two colours which will need three shuttles for the face only (two used at a time). For the eyes I used short bugle beads, 2 for each eye and 3 for the mouth. The simplest way to avoid a knot at the beginning of the face is to work R1 (covering the shuttle thread with the first few ds) and then reversing the work, wrapping Wsh2 thread round the Wsh1 thread and starting R2 (again covering the shuttle thread with the first few ds). Continue as usual with SR3. The cat is worked in three parts.

## Face - two shuttles filled with lighter colour. Change Wsh2 to dark after SR4

Starting with Wsh1
R1: 10 vsp 5 vsp $5+B$ to centre of $R$ Rw \& change to Wsh2
R2: (nose) 2 vlp 1 vlp 2 vsp 2 vlp 1 vlp 2 Rw \& change to Wsh1
SR3: $5 \mathrm{vsp} 5 / 10+B$ to centre of R
SR4: 4 / 4 Change Wsh2 to dark colour
SR5: $8 / 8$
R6: 8 vsp 8 Rw
Ch: 4 Rw
SR7: 4 / 4 Change to Wsh2
R8: 4-4 Change to Wsh1
