This is the smallest fish and it measures 2 3/4" in length x 2" in height. Skills needed - knowledge of split rings and rings on split rings.

Materials

No. 20 thread, 1 bead and two shuttles.

Abbreviations

SR	split ring	+	join	RoSR	ring on SR	T & C	tie and cut
Wsh1	working shuttle 1	Wsh2	working shuttle 2	vsp	very small picot	Lj	join using shuttle thread
btwn	between	Cl	close ring	SLT	shoe lace trick (tie knot)		

+B The bead is added to the core thread which is pulled down through the 1st vsp towards the centre of the ring. Once the bead has been added to this, pass the shuttle through the loop before tightening the ring.

In order to simplify the instructions the pattern tells the worker to join to a - or vsp of a previous SR. In fact, you will find that it is a - or vsp on a chain which has previously been joined to the SR which you actually need to join to. In the instructions for the insert opposite it would therefore read:-

SR3: 4 + (SR1) 4 / 4 vsp 4

Centre of body using two shuttles - Wsh1

R1: 3 - 3 vsp 3 vsp 3 +B (see abbreviations)

SR2: 2 vsp 2 / 2 RoSR (2 vsp 2 Cl) 2
