

Pamela's Gecko - © Jane Eborall 2007

Amended – 2013 to include more diagrams

[Click here](#)

[Click here](#)

The gecko is worked in one pass and uses an alligator join in one place. The alligator join is simply just taking the one shuttle thread behind and the other shuttle thread in front of a given place (in this case the space between two SR's) and then continuing with the chain.

For easy block tatting [please look at this page](#) – especially the joins.

For a two coloured gecko - use a shoe lace trick before each SR on the body. Beads can be added to the centres of the SR's from SR1 to SR23.

Number 20 thread it measures 5", with number 40 it's 4 ½" and number 80 it's 3 ½" in length.

Note – for those who prefer front side/back side tatting the text in *italics* and red indicates where the worker needs to use the second half of the ds first.

Abbreviations

| | | | |
|--------|---------------------------------|------|--|
| R | ring | Ch | chain |
| – or p | picot | SR | split ring |
| / | after the / make 2nd half of SR | MB | move bead on core thread close to last ds worked |
| Lj | join made with shuttle thread | vsp | very small picot (smallest you can make) |
| T & C | Tie and cut | + | join |
| Sh1 | Shuttle 1 | Sh2 | Shuttle 2 |
| Rw | reverse work | Btwn | between |

Add 2 beads (slightly larger than seed beads) to Sh2 for the eyes before starting.

NB if using two colours please ensure that Wsh2 is being used when starting the chain after SR28.
