# Tattysaurus the Dinosaur <br> Jane Eborall © 2000 

## Introduction

The tattysaurus (measuring approx. $16^{\prime \prime}$ nose to tail) is made up of sections of tatting worked between very narrow metal (Indian) bracelets each measuring $23 / 4$ ". The two body sections are straight and the three neck sections are wedge shaped and worked at angles to each other. (See Figs. $1 \& 1 \mathrm{a}$ ). The face is worked in sections - upper and lower with sides to both and 'cheeks' in between. The tail is worked in decreasing rows. Wings and legs are worked separately. Split rings are used in the wedge shapes and legs. The wings are split rings with rings worked on the second half of the split. The whole tattysaurus can then be stiffened (I used PVA glue, but only on the face).

Fig. 1

## Materials:-

No. 20 Manuella thread in green (all rings) and contrast colours (bright) for the chains and some split rings. White for eyes. Small gold rocaille beads. Two large beads for eyes. 6 bracelets. PVA glue or other stiffening agent.

## Abbreviations

BR1 bracelet 1
Ch chain
+B
Vsp

> BR2 bracelet $2 \quad R \quad$ ring
> SR split ring + join
> join \& add bead to picot being joined to
> very small picot $S$ starting place

## Neck/wedge sections (3)

(Wsh1 = green, Whs2 = contrast)
NB The sections do not meet at each end of row 1
Row 1 - Wsh1 \& Wsh2 (see Fig. 2)

$\square$ The next wedge section of the neck is joined to the previous one in exactly the same way, starting the $3^{\text {rd }}$ row on the new bracelet. On the $4^{\text {th }}$ row, take care to join in between the joins on first wedge's
Fig. 6 bracelet. (See Fig. 6)
When attaching the contra-wedge section to the previous 2 wedges, work as last but attach in the opposite way - i.e. with the narrowest part of the new section attached to the widest part of the previous

section. Join the $1^{\text {st }} \mathrm{R}$ of $4^{\text {th }}$ row to $13^{\text {th }}$ 'space' in row 3 of previous wedge. (See Fig. 7)

[^0]
## Row 3

As row 1 but joining to row 2 and adding a bead when joining to row 2 ONLY (see fig, 12)

## Row 4

Fig. 11b Make second cheek on opposite side of face to match.

## Tail Section

Using green as shuttle thread and different contrast as ball thread on each row. This section is worked onto a new bracelet, which will form the end of the second body section.

## Row 1

R: 4-4-4-4
*Ch: 4 +BR 4
R: $\quad 4+B\left(3^{\text {rd }} p\right.$ of last $\left.R\right) 4-4-4$ Repeat from * 24 times joining final ring to first ring with a bead. Work one further chain to complete ( 26 rings \& chains altogether).
Fig. 12
Rows 2-12

Fig. 13

Fig. 12 R: 4-4-4-4

$$
\begin{array}{ll}
* \text { Ch: } & 4+B \text { (ring of last row) } 4 \\
\text { R: } & 4+B\left(3^{\text {rd }} \text { p of last R) } 4-4-4\right.
\end{array}
$$

Decrease twice on each row by joining two rings with a chain (including a bead). The $12^{\text {th }}$ row will have 4 rings and 4 chains. Joins are made by pulling the $2^{\text {nd }} p$ through the $1^{\text {st }} p$ and adding a bead. See Fig, 13.
Joins should be made opposite each other and as equally spaced as possible with each successive row decreasing at $90^{\circ}$ ( $30^{\prime}$ clock \& $9 o^{\prime}$ clock) to the previous row. See figs. 13a, b \& c below for guidance.

Fig. 13a - join red rings on row 1

Fig. 13b - join pink rings on row 2

Tail Fin - Add 2 beads to Wsh $1 \& 8$ to Wsh 2.
Wsh 1.

SR: $5-5 / 5(\mathrm{R} 3-3 \mathrm{Cl}) 5$
SR: 6-6/6(R 4-4Cl) 6
SR: 7-7/7(R 5-5Cl) 7
SR: $8-8 / 8(\mathrm{R} 6-6 \mathrm{Cl}) 8$

Fig. 20

R: 8 B 8
Ch: 14 See fig. 20a

## Row 2

*R: 8 B 8 Change to Wsh 2 - all joins to last row - See fig. 20b
SR: $\quad 8+\mathrm{B} 8 / 8(\mathrm{R} 6-6 \mathrm{Cl}) 8$
SR: $\quad 7+B 7 / 7(R 5-5 C l) 7$
SR: $\quad 6+\mathrm{B} 6 / 6(\mathrm{R} 4-4 \mathrm{Cl}) 6$
SR: $\quad 5+\mathrm{B} 5 / 5(\mathrm{R} 3-3 \mathrm{Cl}) 5$
SR: $\quad 4+\mathrm{B} 4 / 4$ (R $2-2 \mathrm{Cl}) 4$
SR: $3+$ B $3 / 3-3$
SR: $\quad 2+\mathrm{B} 2 / 2-2$
SR: $1+B 1$ - $1 / 1$ RW
SR: $\quad 6+\mathrm{B} 6 / 6(\mathrm{R} 4-4 \mathrm{Cl}) 6$
SR: $\quad 7+B 7 / 7(R 5-5 C l) 7$
SR: $8+\mathrm{B} 8 / 8$ (R $6-6 \mathrm{Cl}) 8$
R: 8 B 8
Ch: $14{ }^{* *}$
R: 8 B 8 Repeat from * to *:* for rows 4 \&
5
Final row (row 6) Change to Wsh 2 - all
joins to last row
SR: 8 +B $8 / 8$ В 8
SR: $\quad 7+B 7 / 7 B 7$
Row 3 Change Wsh 1 - all joins to last row - SeeSR: 6 +B $6 / 6$ B 6
fig. 20c
SR: 1/1-1-1
SR: $\quad 2+B 2 / 2-2$
SR: $\quad 3+B 3 / 3-3$
SR: $\quad 5+$ B $5 / 5$ В 5
SR: $\quad 4$ +B $4 / 4$ B 4
SR: $\quad 3+\mathrm{B} 3 / 3-3$
SR: $\quad 2+B 2 / 2-2$
SR: $\quad 4+B 4 / 4(\mathrm{R} 2-2 \mathrm{Cl}) 4$
SR: $\quad 5+\mathrm{B} 5 / 5(\mathrm{R} 3-3 \mathrm{Cl}) 5$

Fig. 20c

## Finishing off

Split two bracelets and insert them through the outer picots of the wings down one side, through the body of the tattysaurus and out and up through the second side. Cut to fit and turn ends over to secure.
Catch the legs onto the body with a few stitches.
Using PVA glue, stiffen the body and tail if needed. Dilute the glue with a little water and work carefully into the tatting. Pull into shape and allow to dry. The face may need a stronger solution of glue and it is suggested that the tattysaurus is allowed to dry hanging face down by it's tail! Please email me with any comments or for help on this pattern

[^0]:    Upper Face - the $1^{\text {st }}$ join is made between $9^{\text {th }} \& 10^{\text {th }}$ joins of the last wedge of the body. Further joins are made between following 'spaces'

    Row 1
    R: $\quad 4-4+(B R) 4-4$
    *Ch: 4-4
    R: $\quad 4+B$ ( $p$ of last $R$ ) $4+$ (to $B R$ ) $4-4$
    Repeat from *6 times

    ## Row 2

    R: 4-4-4-4
    *Ch: $4+B$ ( $p$ of first chain of last row) 4
    R: $\quad 4+B$ ( $p$ of last $R$ ) 4-4-4 Repeat from * 6 times
